SUMMARY

Product-minded Design Engineer with 12+ years of experience, including six years in visual design before transitioning into frontend engineering. Specializing in Vue.js, design systems, and building performant, accessible interfaces for complex, data-driven products. A hands-on, action-oriented engineer who takes ownership of products from concept through production.

EXPERIENCE

Bright Funds
Frontend Software Engineer
Remote (PA, US)
March 2021 - April 2023

- Led the design and development of a Vue.js component library using Storybook, establishing component standards, usage guidelines, and reusable UI patterns to improve consistency and accelerate feature development.
- Modernized a legacy Ruby on Rails application by migrating frontend functionality to Vue.js, improving code maintainability and scalability.
- Collaborated with product and engineering teams to design and deliver intuitive, responsive, and accessible interfaces across an enterprise SaaS platform.

Reorg
Frontend Software Engineer
New York, NY
February 2017 - March 2021

- Developed data-intensive financial research interfaces using Vue.js, collaborating with product designers and backend engineers from prototype through production.
- Reduced time to interactive (TTI) by over 60 seconds on a data-heavy table through component optimization and frontend refactoring.
- Led a platform-wide accessibility audit and implemented improvements aligned with WCAG 2.1 AA standards.
- Doubled engagement with a platform feature by implementing search autocomplete suggestions, improving content discovery and usability.
